TUBE FARTS

A Gastro-Dynamic Analysis of Compressed D

By Sum Bunny

I. The Gastro-Physical Tube

In the TUBE framework, the human organism is topologically a torus—a glorified tube interacting with the environment. We ingest structure (R) in the form of food. Through the thermodynamics of digestion, we break this structure down to extract energy.

However, the laws of entropy dictate that you cannot have Creation without distinct byproducts.

- **Solids (R):** The return of matter to the earth. Structure. Mass.
- **Gas (D):** The liberation of chaotic potential. Expansion. Novelty.

A "fart," therefore, is not merely biological waste. It is a **pocket of pure D (Creation)** trapped inside a high-R (Structural) container. It is a hydrodynamic rebellion of the gaseous state against the tyranny of the solid.

(Note: This analysis treats flatulence strictly as a system output, not a moral failure.)

II. The Sphincter: The Ultimate R-Operator

Civilization rests on the structural integrity of the external anal sphincter. In systems theory, this muscle functions as the **Primary Gatekeeper of Social Coherence**.

- **State A (Retention):** The valve exerts **Force R** (Restriction) to counteract **Pressure D** (Expulsion). As long as R>D, social order is maintained.
- **State B (Release):** When D exceeds the tensile strength of R, a phase transition occurs. The gate opens. Chaos enters the room.

The tension between the urge to release (D) and the social necessity to suppress (R) is the fundamental drama of the human condition. We are all walking pressure vessels, desperately trying to keep our internal chaos from leaking into the public domain.

III. A TUBE Taxonomy of Flatulence

We can classify these events based on the ratio of **Audio (R-Vibration)** to **Olfactory Density (D-Signal)**.

1. The Trumpet (High Audio / Low Smell)

- **Analysis:** This is performative D. The gas exits under high pressure through a tight aperture, creating significant vibration.
- **TUBE Rating:** High Signal, Low Consequence.
- **Social Impact:** Comedy. It breaks the silence (R) but does not linger. It is a "clean" disruption.

2. The Silent But Deadly (SBD)

- **Analysis:** This is the "Stealth Bomber" of gastro-dynamics. The aperture is relaxed (Low Audio), but the chemical payload is dense (High D).
- **TUBE Rating:** Zero Signal, Maximum Entropy.
- **Social Impact:** Trauma. The SBD is a violation of the social contract because it arrives without a warning siren. It is invisible violence.

3. The Shart (Structural Collapse)

- **Analysis:** This is a catastrophic system failure. The discriminator—the nerve endings responsible for distinguishing Gas (D) from Solid (R)—makes a calculation error.
- **TUBE Rating:** Total Inversion. Matter that should be retained is released.
- **Social Impact:** Exile. The subject must immediately leave the R-field (the room) to address the containment breach.

IV. The Physics of the Elevator (Variable ki)

The social severity of a flatulence event is determined by the **Conductivity (ki)** of the environment.

$$Social\ Risk = \frac{Volume\ of\ Gas \times Smell\ Density}{Volume\ of\ Room}$$

- **High ki (An Open Field):** The signal dissipates instantly. D merges with the atmosphere. No tension.
- **Low ki (An Elevator):** The signal is trapped. The "Room Volume" approaches zero.

In an elevator, the event becomes a **Recursive Shadow**. It cannot escape. It lingers, forcing all occupants to acknowledge the shared biological reality they are trying to ignore. It forces a "forced intimacy"—a dark communion of breathing the same air.

V. Conclusion: To Fart is Human

Why is this funny? Because farts expose the lie of the **Return (R)**.

We spend our lives pretending to be dignified, solid, consistent entities. We wear suits. We have job titles. We follow rules. But inside, we are bacterial fermentation tanks producing chaotic gas (D).

A fart is the moment the truth leaks out. It reminds the CEO, the Bishop, and the General that they are not just "minds" or "institutions." They are tubes. And sometimes, the tube must speak.

Part of the Sum Bunny Canon (Ark Hive Press, 2025).

This was written through a collaboration between a human author and AI systems acting as analytical tools. The machines provided structure; the human provided judgment. Nothing appears here that the author did not personally create, refine, choose, and claim.

HEY JOSIANE,
I STILL LIKE CURSING THE DARKNESS.
THE CANDLE I'M LIGHTING RIGHT NOW IS FOR SOMETHING ELSE.
SUM BUNNY LOVES YOU!!!
